iQ-Energy

**Integrated, comprehensive autonomous site management
From world AI leader iOmniscient**

Improve the safety and efficiency of your organisation by implementing our robust, Mothership AI for Mission Critical Systems.

iOmniscient's visual AI can drive real-time responses for staff across multiple stakeholders and organisations. We've delivered hundreds of mission critical systems around the world, and have decades worth of experience in the Oil & Gas industries.

We allow you to automate necessary yet time-consuming processes including:

- Roads & Traffic Management
- Contactless Access to different locations
- Autonomous Emergency Services Coordination
- Disaster Management (Fires/Floods/Hurricanes)
- Protect expensive equipment, machines, and raw materials
- Detect smoke or fire, including coloured smoke
- Environment Management (Flood, Fire, Smoke, Hazardous gas detection)
- Worker safety, raising alerts if a person is in danger
